

• PEDESTRIAN TOUCH SENSOR

Touch or infrared Activation can trigger the crossing signal

When the pedestrian touch the button or infrared sensing pedestrians passing by to trigger the crossing signal, the signal controller will change the state of the current signal after receiving the trigger signal, so as to enable the pedestrian to cross the road safely

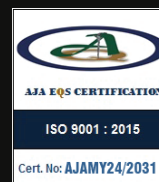

Red light → Yellow light → Green light

Touch pedestrian button / Infrared sensing when pedestrian pass by

Cert. No: AJAMY24/2031

DESIGN

Shell Color : Orange

The shell and lens material : PC

Infrared laser

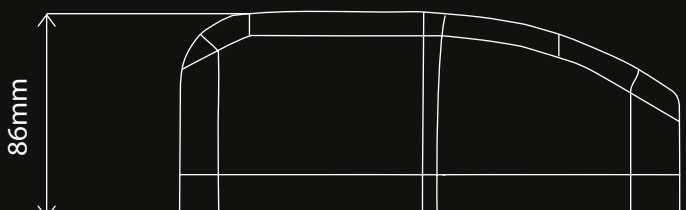

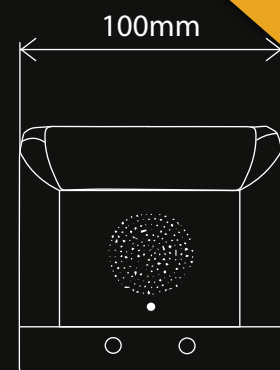

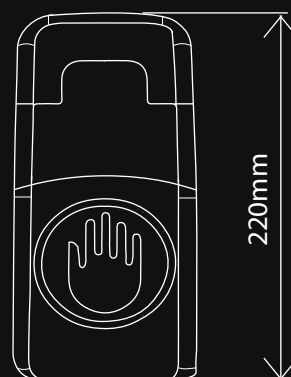

PEDESTRIAN TOUCH SENSOR

Technical specification

Working voltage	Multi voltage optional (DC12, DC24, DC36, AC110, AC220)
Overall power consumption	< 15w
Working temperature	-20°C - 70°C
Relative humidity	< 95%
Protection level	IP65

Size Detail

TRIACS TECHNOLOGY SDN BHD. 201601017065 (1187996-X)

T : 016 6067245 @ 018 4714979
F : (+60)(4) 4905029

NO 2D LORONG CENGAL 1/1A, TAMAN CENGAL INDAH 3 09000, KULIM, KEDAH DARUL AMAN
